Attorney Docket No. 7372/70988

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

YOKAWA, Tomohiro ✓

Application No.: 09/161,283 ✓

Filed: September 28, 1998 ✓

For: LAMINATED EXTRUDED RESIN SHEET

Art Unit: 1773 ✓

Examiner: K. Krueger ✓

July 12, 2002

AMENDMENT

Commissioner for Patents  
Washington, D.C. 20231

RECEIVED  
JUL 18 2002  
TC 1700

Dear Sir:

*Do NOT ENTER HERE*  
In response to the Office Action dated April 22, 2002, please amend this application as follows.

IN THE CLAIMS:

Please amend claims 1, 2, 18 and 19 as follows:

1. (Amended) A laminated extruded resin sheet comprising a methyl methacrylate resin produced by laminating resin layers (B) on both surfaces of a resin layer (A) by a multilayer-extrusion molding method, the resin layer (A) comprising a methyl methacrylate resin, and the resin layer (B) being made by dispersing uniformly 1 to 50 parts by weight of insoluble methyl methacrylate resin particles having a weight-average particle size of 0.1 to 100  $\mu\text{m}$  based on 100 parts by weight of a base resin comprising a methyl methacrylate resin.

01 FC:115 110.00 CH

2. (Amended) The laminated extruded resin sheet comprising a methyl methacrylate resin according to Claim 1, wherein the methyl methacrylate resin in the layer (A) and the layer (B) is a resin containing 50% by weight or more of a methyl methacrylate polymer or a copolymer comprising 50% by weight of more of methyl methacrylate unit and a monofunctional unsaturated monomer unit as a constituent unit.

18. (Amended) A laminated extruded resin sheet comprising a methyl methacrylate resin produced by laminating resin layers (B) on both surfaces of a resin layer (A) by a multilayer-extrusion molding method, the resin layer (A) comprising a methyl methacrylate resin, and the resin layer (B) being made by dispersing uniformly 1 to 50 parts by weight insoluble methyl methacrylate resin particles having a weight-average particle size of 0.1 to 100  $\mu\text{m}$  based on 100 parts by weight of a base resin comprising a methyl methacrylate resin, wherein a layer thickness ratio of resin layer (B)/resin layer (A)/resin layer (B) is from 1/200/1 to 1/1/1, and wherein the base resin comprises 100 parts by weight of a methyl methacrylate resin and 5 to 70 parts by weight of a rubber-containing polymer.

19. (Amended) The laminated extruded resin sheet according to Claim 18, wherein the resin layer (A) is made by dispersing uniformly 3 to 50 parts by weight of a rubber-containing polymer into 100 parts by weight of a methyl methacrylate resin.
